The Board welcomes comments on all aspects of its draft strategic plan. Comments are most helpful when they indicate the specific issue to which they relate, clearly explain the problem or concern, and provide a suggested alternative approach with supporting reasoning.

The Board is particularly interested in obtaining comments on the suitability of its overall approach of continuing with the strategies applied during the period covered by the strategic plan for 2006-2011. The Board is interested in comments on those strategies and also on its proposal to provide an opportunity for the effects of the strategies to “bed down” for a few years. The Board and its stakeholders would then have a reasonable opportunity to assess whether any modifications to the strategies might be necessary and, if so, what actions should be taken in response to that conclusion.
